

What is going to happen in your complex?

Rochdale has spent the past few months investigating what is needed to improve your complex. We want to make the building more sustainable and resolve complaints such as draughts, moisture, mould and cold. To this end, we looked at the results of the 2024 housing survey and the technical home visits in August.

Your opinion is also important! That is why you are receiving our plan of action with this letter. It broadly outlines what work we intend to carry out and what this means for you.

You are invited to our **information session**. You will be able to ask questions about the work and let us know what you think of the plan.

When:

- **Date:** Saturday 1 November
- **Time:** from 11.00 to 15.00 hours
- **Location:** Het Waaltje community centre, 231 Waalenburgsingel

We look forward to seeing you there!
